

Strategic Partnership Brings LBA Cybersecurity into the ITPartners+ Family

Grand Rapids, MI (Aug 18, 2026) – ITPartners+, an award-winning managed service provider (MSP) headquartered in Grand Rapids, MI, is excited to announce its strategic partnership with LBA Cybersecurity (Leeward Business Advisors), a Kenosha, Wisconsin-based MSP specializing in advanced security solutions and managed IT services.

Founded in 2014, LBA Cybersecurity has built its reputation around a security-first approach to managed IT. Their focus has always been on helping small and medium-sized businesses stay protected in an environment where cyber threats are constantly evolving. LBA's approach is built on the belief that technology should serve as an enabler for the businesses they support, and that partnership is a critical success factor for delivering an outstanding client experience.

"Building LBA has always been about being a real partner to the businesses we support," said Jason Klein, CEO of LBA Cybersecurity. "Finding ITPartners+ meant finding a team that operates the same way. This partnership gives our clients access to deeper resources and broader capabilities, and I couldn't be more excited about what we're building together." Through this partnership, LBA clients gain access to expanded engineering resources and ITPartners+'s POD-based support structure, which connects clients directly with technical specialists across systems, security, and strategic planning.

"What stood out about Jason and the LBA team wasn't just what they do. It was how they do it," said Kevin Damghani, CEO of ITPartners+. "Jason and the LBA team have built something in their market that's grounded in real relationships and genuine care for the people they serve. That's exactly the kind of partner we want to grow with."

Both organizations share a commitment to proactive service, cultural alignment, and long-term client relationships. This partnership brings together two teams focused on doing great work, building real partnerships, and delivering consistent value to the businesses they serve.
