

Ciracom Cloud Joins Forces with ITPartners+

Grand Rapids, MI – ITPartners+, an award-winning managed service provider (MSP) headquartered in Grand Rapids, MI, is excited to announce its merger with Ciracom Cloud, a Greater Washington, DC area MSP known for its security-first, cloud-first approach to IT.

For more than two decades, Ciracom Cloud has helped small and midsize organizations grow, scale, and thrive. The company built its reputation on a passion for helping organizations achieve more using technology, backed by curiosity, personalized service, and customer care. That same commitment to relationships and dependable support is what made this the right fit for both organizations and the businesses they serve.

As part of the combined team, Ciracom's partners gain access to a deeper engineering bench and broader technical resources, built to support them not just for today, but for the long run. Together, the two organizations bring complementary strengths across cybersecurity and cloud solutions, expanding what they can expect while upholding the standard of service Ciracom has always been known for.

ITPartners+ is built around three things that shape how it shows up every day: empowered people, modern work enablement, and a real partnership. That approach, paired with a long-term mindset and a genuine commitment to doing great work, is what makes ITPartners+ and Ciracom Cloud a natural fit. The team is now focused on supporting every partner's success at every step.

This marks an exciting new chapter for both organizations. It brings together two teams that share the same belief that technology and IT support, done right, positively impacts people.
